Sightings of 1967 - 2 July 67

Rec at TDFT/FO in Jan 68

At 3:00 P.M. Central Daylight time, on July 2, 1967 I was watching a baseball game at the Jennings Stadium in St. Paul, Minnesota. It was a cloudy-ply cloudy day, with ~~rainclouds~~, scattered with alto-cumulus. I was thinking of news I had read that bright lights, like those there, could produce after-images in the eye. I was testing this, and it worked with only faint images. I was disappearing, I looked back. I saw a fighter jet go over just south ~~out~~ of the field. Excited by my thinking of UFO's, I looked up and found I was looking at a flying saucer over to the ~~press box~~ west of the ball park. Watching it fly SW to NE ~~about~~ about like the speed of a prop airplane at that height. It passed over the lights (always at a constant speed, not moving with my eyes) and toward the low cloud. I just barely went over the cloud and was obscured to me for its journey across the cloud, about 3 sec. It came out and then climbed very fast, disappearing into the heavens. I was so absorbed in it I didn't call my cousin's attention to it, and I should be. The others didn't believe it, but my mother did, since she doesn't doubt my honesty and believes in UFO's, like ~~I do~~,  
It was bright metallic in color, and was not an afterimage of the field lights, since I ~~had~~ <sup>had</sup> tested this. It was definitely round.  
If it were 2:00 it could be or 4:00 a balloon, but weather stations don't launch them at 3:00. (I don't think. . .?)  
It was moving against the wind, which was a north wind.  
While moving laterally it was a disc viewed from side. When it ascended, it tilted upward to get a bottom view.  
There was no sound. There were 2 cloud layers as it went over the upper one which was almost non-moving. The lower cloud moved very fast.

Dear Sirs in Project Blue Book,

The last time I wrote you I mentioned a couple of sightings. I must add details to one, as I wasn't able to get them on the other. I am a loyal member (new) of APRO. I don't have much faith in your investigation methods, but here are two sightings anyway.

Subject and witness [REDACTED]

[REDACTED] During my interview with him he said it ~~happened~~ happened 10-12 yrs ago. This would be 1955 or 57

He says: "I was about the altitude of the saucer when my wife and I saw it glide across the road about a quarter of a mile away. Another party at Ray by name of Silander saw it the same night. Silander was under it and it looked like a saucer to him... I was on the highest point of the county road in this neighborhood... few stars... moon was overhead... at was about 10:30 p.m. It looked like aluminum as if a flood light was turned on it. The space around it was sort of illuminated same shape as the main body of the UFO (to the dots in illustration marked "x") It traveled north, no noise.

Mr. Melheim is a retired lawyer who came to America from Norway. He raised reindeer as a side-line when younger. He is well-educated. He is in his seventies and lives on the shore of Lake Kabetogama near Bemidji, Minn.
